

Chatbot Feature for Coverage Page

The third feature of the project involves adding a chatbot to the coverage.html page. This chatbot is designed to assist users with navigation, helping them find the information they need more efficiently.

Layout and Design

The layout for the chatbot consists of two main components: the chatbot box and the chatbot icon. The chatbot box will appear when users interact with the chatbot icon and will provide them with a space to ask questions and receive assistance. Below is the CSS code for the layout and styling of these components.

Chatbot Box Style

The chatbot box is designed to appear at the bottom-right of the screen, providing a non-intrusive yet easily accessible space for users to interact with the chatbot.

```
.chatbot-box {  
  position: absolute;  
  bottom: 80px;  
  right: 0;  
  width: 350px;  
  height: 450px;  
  background-color: white;  
  border-radius: 12px;  
  box-shadow: 0 5px 30px rgba(0, 0, 0, 0.3);  
  display: none;  
  flex-direction: column;  
  overflow: hidden;  
  opacity: 0;  
  transform: translateY(20px) scale(0.9);  
  transition: all 0.4s cubic-bezier(0.68, -0.55, 0.27, 1.55);  
}
```

Chatbot Icon Style

The chatbot icon is a circular button placed on the bottom-right of the page. It is designed to attract attention with an animation, encouraging users to click and interact with the chatbot. The following is the CSS code that defines the chatbot icon's appearance.

```
.chatbot-icon {
```

```
width: 70px;
height: 70px;
background: url("../images/chatbot.jpg") no-repeat center center;
background-size: contain;
border-radius: 20px;
position: relative;
display: flex;
justify-content: center;
align-items: center;
cursor: pointer;
box-shadow: 0 6px 16px rgba(0, 0, 0, 0.2);
transition: all 0.3s ease;
animation: pulse 2s infinite;
}
```
